Education

Nutan College of Engineering & Research Pune <i>B.Tech in Computer Science & Engineering — CGPA: 7.45/10</i>	Pune, India 2023 – 2027
Tukaram Kayande Secondary and Higher Secondary School <i>HSC — 70.17%</i>	Buldhana, India 2022
Deulgaon Raja High School Deulgaon Raja <i>SSC — 82%</i>	Buldhana, India 2020

Technical Skills

– Languages:	Java, Python, SQL
– Frontend:	React.js, CSS, Tailwind CSS
– Backend:	Spring Boot, REST APIs, Hibernate, JPA, JWT
– Databases:	MySQL
– Tools / Platforms:	Git, GitHub, Postman, IntelliJ, VS Code, Antigravity
– Core CS:	DSA (Java), OOP (Java), DBMS, Operating System, Computer Networks

Technical Projects

E-Learn PRO – Full-Stack E-Learning Platform [🔗](#) 2026

- Built a scalable e-learning platform supporting 100+ concurrent users with secure JWT-based authentication and role-based access control (Student, Instructor)
- Optimized database performance by reducing queries by 60% through resolving N+1 issues using **@EntityGraph** and advanced JPA strategies
- Enhanced API response time by 40% using Redis caching (average latency ↓200ms)
- Achieved 70% test coverage using JUnit, Mockito, and TestContainers; documented REST APIs with Swagger
- Containerized application using Docker Compose and deployed on Render + Vercel ensuring 99.9% uptime

AI Content Moderation System [🔗](#) 2026

- Developed an AI-powered moderation system handling 1000+ requests/day with 95% accuracy using Hugging Face NLP models
- Designed threshold-based filtering pipeline (auto-flag, review queue, auto-approve) with human-in-the-loop validation
- Reduced response latency to **200ms** using FastAPI asynchronous processing and background task execution
- Integrated OpenCV for video analysis and NLP models for multi-modal content moderation (text, image, video)
- Deployed scalable solution using Docker on Hugging Face Spaces and Vercel with 99.9% uptime

Email Writer Assistant – AI Gmail Chrome Extension 2025

- Built a Chrome extension with 1000+ weekly active users generating AI-powered email replies in Gmail and Outlook
- Integrated NVIDIA Llama 3.1 via Spring Boot backend for context-aware responses with 2–3 seconds latency
- Implemented MutationObserver for dynamic DOM injection achieving 100% UI reliability across updates
- Optimized frontend performance using Shadow DOM and Manifest V3 service workers (↓100ms script injection)

Certifications

– Java Spring Boot Certification – Spring Boot, Spring Security, REST APIs, Hibernate, JWT	2026
– AI Skill-Up Program – GeeksforGeeks – Explored real-world AI integrations	2025
– AI on Jetson Nano – NVIDIA – Worked on edge AI and real-time deployment	2025

Leadership Experience

Team Lead – Hackathon Competitions 2024 – 2026

- Led teams of 2–6 developers across Smart India Hackathon, Meta x Scaler, and Google Developer Hackathon
- Achieved Stage 1 nomination in Smart India Hackathon 2024–2025 by delivering a functional prototype within 36 hours
- Managed task distribution, technical architecture decisions, and final presentations for all competitions
